#### "ABSOLUTELY!"

Einstein has been among us, and has left the impression of a kindly personality and a strong mind. It may be true that only 13 persons in the world understand his theory in full: it may even be that he might say what Hegel is alleged to have said, "Only one man understands me, and he does not." But the fundamental theses of Einstein are not very difficult to understand. They are two:

First, all motion is relative. Secondly, the velocity of light is independent of the velocity of its source.

The first we can believe as soon as we understand what is meant by it. The second bewilders us, but when we know what Einstein is talking about, we have no desire to contradict him.

But when we come to the application of these principles, we find ourselves in deep water. We have assented very cheerfully and without much thought to principles which will keep us thinking for a long time. Before we are through, we are wondering whether parallel lines do not meet, and whether anything is as we thought it was.

One thing we may as well learn, which is that there are not so many uses as some people suppose for the word "absolutely."

"That was absolutely the worst dinner any man ever ate."

"That road was absolutely the worst any man ever tried to drive a Ford car over." "Strawberry ice cream is absolutely the nicest

"Absolutely" is a word to be used only three or

four times in a lifetime, Herbert Spencer asked whether the captain of a vessel, walking westward on the deck of his ship

sailing east, and walking just as fast as the ship is sailing, let us say four miles an hour, is really

He is moving with the earth on its axis at the rate of a thousand miles an hour; he is moving around the sun at the rate of 70,000 miles an hour; and no one knows how much faster he is moving with the solar system. And he is moving with slow currents and tidal movements of the ocean. We know of few things that are stationary, and we have infrequent use for the word "absolute."

## MEMORIAL TREES.

Pres't Harding has given his hearty approval to the movement for planting memorial trees along the important highways of the country in honor of the Americans sacrificed in the great war. In doing so he truly said:

"It would be not only the testimony of our sentiments, but a means to beautify the country which these heroes have served."

Certainly there could be no more beautiful memorial, none more dignified, than a great tree, and we hope the president's indorsement will mean an increased regard for trees generally and the planting of many trees not only along the highways but

Apart from the planting of memorial trees the movement may do much good as a reminder of how criminally wasteful of our forests we have been. They were a wonderful asset, economically and esthetically, but we have destroyed them as if we hated them. We are still destroying them, notwithstanding a late awakening of public opinion. Let us hope that we shall soon see a day when no man in this country can cut down a tree without planting one to take its place.

# A REAL APPETITE.

Order of the Golden Fleece archives are claimed by Belgium and Austria, and the ownership is being decided by a jury appointed by the reparations

Charles V was a knight in the order when he died in 1556. The archives show he was reprimanded for gluttony. Under examination he admitted he often ate four meals a day, starting with "the best part of a chicken at 5 a. m."

Gluttony by the few in those times was matched often by starvation fare for the many. Perhaps the lew who are so much are from pride, because they could get it. Charles' great eating would impress some rich men today, not with distaste for his excesses, but with envy of his enormous appetite,

# THE PLACE YOU DREAM OF.

There still remains one place on earth, inhabited by white people, where there's no work-and no axes, no laws, no police, no tag days, no strapanging, no alarm clocks-and nothing to worry bout, Tristan da Cunha is the place,

niles southwest of St. Helena, where the imprisoned apoleon died. The Tristanites are descendants of he relief garrison of British soldiers stationed there uring Napoleon's captivity. Tristan is such a ealthy place that nobody ever gets sick, so there re no doctors. Once the people had a chest of redicine, but about 18 years ago they got tired of aving it around in the way, so they ditched it into

It's an island in the south Atlantic ocean, 1,500

You've dreamed of a place like Tristan. It's the ort of paradise you yearn for when life in South end gets your goat and you'd like to crawl in a ole and pull the hole after you,

Only about 100 people live on Tristan, but they past that no one ever wanted to leave. The only hip that ever visits them is a British cruiser that rops in once a year. No other contact with the tside world. If you could stow away aboard that

An island 21 miles around. A snow-clad extinct leane rising in the center. A small village on a rtile green peninsula. Nothing to make people erk. Nothing to pay taxes for. The inhabitants fish, wild fowl, birds' eggs, clams, fruit and wild

potatoes. When they want meat, they go out and kill wild sheep or cattle. Clothing and ammunition are obtained from the crew of the cruiser by bartering skins of the seals that sport on Tristan's rocky

Tristan is said to be the only white settlement in the world that has no organized government. Inherited discipline from the people's soldier-ancestors, along with such an abundance of everything that there's no reason for committing theft or other crimes, has made laws and organized government unnecessary. The nearest neighbors are 1,200 miles away. While everybody in Tristan has all he wants and is contented, there's nothing worth stealing by invaders. Hence, no worry about wars.

Wouldn't Tristan be a wonderful place to migrate to, with your 100 best friends? There may be better places to live than Tristan, but-well, we'd li's to take a poll of South Bend people, just to find out how many are weary of this perverted civilization of ours and its work, taxes, tag-day drives, politics, this-and-that "weeks," surly strangers and the glaring sun on city streets.

#### WHAT EDISON THINKS OF YOU.

Inventor Edison, to determine whether college men are what he considers ignoramuses, asks them 78 questions. He calls the test his "ignoramometer." The 78 questions were put up to Edwin Roche Hardy, Columbia university's 12-year-old "prodigy." The lad turned in 53 answers. He said, among other blunders, that Tallahassee is in Tennessee, that Horace Greeley founded the N. Y. Herald, and that mahogany is the hardest wood.

Don't smile at the boy-wonder until sure you could do as well. Admitting that many folk would answer that copra is a snake, that John Hancock was the founder of an insurance company, and that one of the ingredients of good white paint is a brush that doesn't shed bristles, there are several of the Edison questions that can't be answered di-

For instance, who invented printing? The correct answer, supposedly, is Gutenberg, A Chinese would differ, claiming that his ancestors printed from movable type several thousand years before Guten-

"What are felt hats made of?" Answer: Hair or fur fiber. But is this accurate? Many felt hats appear to be made from the sweepings gathered up by a vacuum cleaner.

Probably there are many who think that the cotton gin was invented by some bartender. If Edison wants a real "ignoramo-meter," he should include these questions:

How many home runsdid Babe Ruth knock out

Why does a man take off his hat instead of his collar when riding in an elevator?

If a dollar bought only four pounds of sugar in 1920 when you had it, what is a dollar worth now when you haven't got it?

How many raisins should be used to the gallon? What was the name of the genius who figured out how far apart to place railroad ties so they can be walked on only with difficulty?

Answer those and qualify-for a job in an information bureau!

Wouldn't the Modern Youth throw a fit if he had to do some of the chores that were wished on father when he was a boy!

The way elevators work in some office buildings suggests that it might be better to keep the elevator on the ground and raise and lower the building.

In every country town, there is some fellow who seems never to do anything except sharpen an ax.

# Other Editors Than Ours

POLAND AND THE TREATY. (Indianapolis News.)

In his speech in the house of commons yesterday, Lloyd George condemned strongly, but none too strongly, the conduct of the Poles in Upper Silesia, and at least implied that the government of Poland was not without blame in the matter. though he was disposed to accept its disclaimer of responsibility. The prime minister said:

"Vilna was occupied by regular Polish troops in deflance of the allies. They were asked to retire, and they said: "We have no responsibility for it." The same thing is happening now, the same disclaimer of responsibility. Arms passing from Poland and officers crossing her frontiere make it very difficult to feel that those repudiations of responsibility anything but purely

The Polish people owe their liberty and independence, as pointed out by Lloyd George, wholly to the allies and to the Versailles treaty. Yet they are engaged in a flagrant violation of that treaty which the allies are bound to enforce. Poland, which did not win its liberty, but received it as a gift from the allies, is the last country in Europe that has a right to complain of the Versailles treaty. The Poles were divided in the war, half of them, as the prime minister said, fighting on the side of Germany, "They fell," Lloyd George said, "in German uniforms, and shot down Frenchmen, British and Italians who were fighting for their freedom." The question is one of enforcing the treaty and maintaining the peace of Europe. The allies are bound to enforce the treaty. The speaker could see but two ways of doing it, either by the use of allied troops, or else by permitting the Germans to do it. That is a matter for the allies to decide. But there can be no question that the treaty must be upheld. The case could hardly be better stated than in the following words:

"Not merely to disarm Germany, but to say that such troops as she has are not to be permitted to take part in restoring order-that is not fair. To say to Germany: 'Here is your province, here is something which has been decided by the treaty of Versailles, either for or against you, but Poles are to be allowed in defiance of that treaty to take it, and you will not be allowed to defend yourselves in a province which has been yours for 200 years, and which certainly has not been Polish for 600 years,' is discreditable and not worthy of the honor of any land. I am perfectly certain that will not be the attitude the allies will take. The only thing which I would like to say in behalf of the government is this: Whatever happens, we can not accept a fait accompli. That would be to permit a defiance which might lead to consequence of the most disas-

trous kind." But for the treaty which the Poles are now violating, and the support of Great Britain, France and Italy-and we may add the good will of the United States-the new Polish state could not possibly live. If Germany were not disarmed, under the Versailles treaty, she would long since have taken all the territory of Poland that she desired to take, and have reclaimed all the territory that had been assigned to Poland by the treaty. The war of the Poles is, not against Germany, but against the allies, and against the peace and safety of Europe, and

the world. The prime minister said: "It, therefore, is essential in the interests of the nation that whatever our prejudices and predilections, whether we like this man or dislike the other, we should recognize that justice has nothing to do with likes or dislikes and that we must decide fairly and sternly according to the pact which we ourselves have

That pact is the law of Europe, and also the charter of Polish liberties. It binds the allies and Poland-quite as much as it does German"
